New triangles:

- Added more triangles for the [chemical substances](#). Like in other parts of the system, where we have expanded the Hegelian system to include new areas/discoveries, we have marked them in brackets "[]" (e.g. in the areas [classification single-cell organisms < https://hegel.net/en/e23133.htm#tri2 >](#) , [classification plant kingdom](#), [classification animal kingdom < https://hegel.net/en/e233312.htm#tri2 >](#) , and [sun/light < https://hegel.net/en/e22111.htm#tri2 >](#)), as well as the [books of the bible](#). (2020-09-11, revised 2020-09-17)

Primary Sources

- Added [English translation of Hegel's Nürnberger Encyclopedia](#), the earliest know version of his Encyclopedia, which he wrote for lecturing his older teenage pupil when he was schoolmaster at the Ägidiengymnasium, Nürnberg. Some parts of the translation have been done by translation programs. So it may still contain errors. Please compare the [German version < https://hegel-system.de/de/nbg-enz.htm >](#) , when in doubt. In case you find some errors or have some suggestions for better translations, please let us know. (2020-09-08).
- Added [Who thinks abstract?](#), an early nice little essay of Hegel, in which he argues that ordinary people think abstract, not philosophers. With several examples. We also provide versions in other languages as well (as always, you can switch languages via the flag menu in the top right corner).(2020-09-07)

Kai's Hegel workshop - Logic and metaphysics, basic concepts

NEW articles:

(Pls. note that the following article, like all Hegel workshop articles, are first translations of older articles from Kai Froeb's "Hegel Workshop" (Hegel Werkstatt). They claim to be inspired by and compatible with Hegel's philosophy, but in no way do they cover all aspects of Hegel's thoughts on the subject. Instead, I (Kai) try to develop a fresh argumentation in my own words, without too much quotes from Hegel. So all possible errors are from myself. I hope you find them helpful anyway. In any case, I'd like to hear your feedback).

- [On Infinity](#) - Explains the "true" infinity within Hegel's Philosophy, a central concept of him. It also relates to the concept (see our [concept tutorial](#)) and to [truth](#). (2020-09-07).

August 2020

This month, the 27th of August, we celebrate Hegel's 250th birthday. Happy birthday Hegel!

New triangles:

- The number of items in the [Hegel Triangles representing the terms of the Phenomenology](#) have been doubled from 63 to 127. Still more will follow in future. In the process, we also expanded several of the shortened page titles so that they resemble more the original titles of the table of content of the Phenomenology. (2020-08-26 to 2020-08-28)

July 2020
